groovy_gabbs 🌀🌸 Everyone has a moment of sadness whilst looking at the past. I know that I do. The past can sometimes feel happier than the present because you remember all of the good times. Lately, I've been seeing old photos from a year ago. I know that presently, I'm much happier. This probably sounds like a big ramble, but it's mainly a note to myself stating that the past defines you as well as how you act in the present. Don't look back at the past and be sad that it's over. You're supposed to build off of your past self and keep building until you're the best person you can be. Always keep looking forward and live every moment as fulfilling as you can possibly make it. Be happy.
